

MARANGONI AT ECOMONDO 2016

The Marangoni Group took part in the twentieth Ecomondo, the technological platform for the Green and Circular Economy in the Euro-Mediterranean area.

Rovereto (Italy) – Ecomondo, held in Rimini from 8 to 11 November 2016, represented an opportunity to confirm the Group's commitment and attention to the critical aspects faced by companies operating in waste collection and disposal business. This sector in fact has very specific needs, to which Marangoni's solutions always offer the right response.

Operators working in the waste management supply chain or in the related logistics have ascertained how the Marangoni offering can fully meet their individual requirements: from tyres for heavy transport vehicles operating in sites where increased resistance to cuts and tears is needed, to solid tyres for materials handling equipment in areas with particularly challenging surfaces, and even tyres for vehicles travelling regional routes, able to withstand wear and guarantee excellent mileage and high reliability.

During the event in Rimini the Group exhibited several of the most interesting products for these segments, including Marix brand truck and earthmoving retreads, Marangoni and Kama truck tyres, and finally the integrated system for loaders comprising the Eltor 3 twin solid tyres.

At the Marangoni stand, the company's technical-sales personnel offered visitors specific consulting, suggesting the Group's most suitable products and trusted dealers.
