

Marangoni Tread Latino America obtains INMETRO certification

The Brazilian production plant is compliant to all the strictest technical standards for the products' quality

Lagoa Santa (BR) – Marangoni Tread Latino America is pleased to announce it has been accredited with the **INMETRO certification** for its production of TBR precure retreading materials (RINGTREAD and Unitread).

In order to reach this important milestone, Marangoni's Brazilian production plant has been independently assessed and verified by the Institute Falcão Bauer. The certificate released by INMETRO – the National Institute of Metrology, Quality and Technology – has a significant importance in the retreading industry, because it guarantees that the company is working in **full accordance with all the strict technical standards for the products' quality**.

Marangoni is operating in Brazil for nearly two decades in a demanding market, that is driving the company to make continuous improvements aimed at providing **complete, sustainable and cost-effective solutions**.

Giacomo Melotti, Marangoni Tread Latino America's General Manager, commented: *"This accreditation represents a clear commitment to the quality of Marangoni's products, reaffirming the mission to provide the best in the truck and bus tyre retreading sector. We believe this demonstrates to our clients, partners and to the transportation fleets, that we are fully dedicated to constantly improve our products and services."* He said: *"We are proud to have achieved this recognition and we will be continuing to review our production processes to improve them further."*

It is worth remembering that this year, Marangoni Tread Latino América received also an **upgrade of ISO 9001:2015 and 14001:2015 certificates**, confirming again the alignment to the best world quality and environmental standards.
