

Marangoni at Reifen Essen 2014: the latest in tyre retreading.

The Marangoni™ Group will be taking part in the Reifen Essen 2014 exhibition, highlighting the innovations that the Group has introduced in the retreading sector, regarding both products and technological processes.

In the main stand - Stand C42, Hall 3.0 - a video will be projected onto two large LED walls to present the products and technological solutions that the Group offers in the sectors of truck tyre retreading systems (Ringtread System) and of hot retreading for truck and earthmoving tyres (Marix).

Not far away (Stand 11A29, Hall 11) Marangoni Meccanica and its TRM division (Tyre Retreading Machinery) will offer visitors the chance to see and touch with their own hands the Black Constrictor, the company's latest release in the area of building machines for retreading with precured tread strips.

Once again this year, the main stand will be hosting the traditional "hospitality suite", and will have that "homely feel" that has always defined Marangoni's events and its dealings with customers from all over the world.
